

Lore (2)

This skill represents the most advanced forms of academic and magical study on Jhoril. It can be used to gather information on various topics from the mundane to the fantastic. This is also how to determine the capabilities of a magical item. Each purchase of the skill allows you to ask a question, spend time researching a topic, or spend time figuring out how to use a magical item. Multiple purchases of this skill may be applied to a topic to glean more insight or get a 'better' answer. This skill is used between events.
